**Regional School District #4**  
**Chester – Deep River – Essex – Region 4**  
**Regional School District No. 4 Special Meeting**

To: Members of the Regional School District No. 4 Board of Education  
Subject: **Region 4 BOE Special Meeting – Thursday, February 24, 2022**  
Time: **4:00 p.m.**  
Place: **Via Google Meet – To listen remotely please dial (US) +1 (617) 675-4444 PIN: 678 908 044 0522#**  
(We kindly ask that you **please mute your phone immediately** upon connecting to the meeting as this will improve the audio quality for all participants. Google Meet may do this automatically, depending on the number of people already connected to the call. If so, pressing **\*6** will unmute your phone when it's time to speak)

Please contact Jennifer Bryan at Central Office email [jbryan@reg4.k12.ct.us](mailto:jbryan@reg4.k12.ct.us) if you are unable to attend.

Mission Statement

We, the communities of Chester, Deep River, Essex and Region 4, engage all students in a rigorous and collaborative educational program. We prepare our learners to be respectful citizens who are empowered to contribute in a globalized society.

**AGENDA**

- 1. Call to order and Verbal Roll Call** – Chair, K. Sandmann
- 2. Discussion and possible VOTE to approve the following resolutions related to the JWMS Security Project as required for application to the State:**  
  
**RESOLVED** that the Region 4 Board of Education authorizes Regional School District 4 Board of Education to apply to the commissioner of Administrative Services and to accept or reject a grant for the JWMS Security Project at John Winthrop Middle School.  
  
**RESOLVED** that the Region 4 Board of Education hereby authorizes at least the preparation of schematic drawings and outline specifications for the JWMS Security Project at John Winthrop Middle School.
- 3. Discussion and possible VOTE** to approve the educational specifications for the JWMS Security Project at John Winthrop Middle School for submittal with application to the State (*encl #1*)
- 4. Executive Session - Pursuant to Section 1-200(6)(D) of the General Statutes-** contracts/negotiations – re: possible sale of R4 owned property at Falls Landing / (continue review of offer and potential response)
- 5. Possible Action Item** – possible VOTE to authorize the Superintendent to direct the District’s realtor to share a Board approved response to the offer made by a prospective buyer for the possible purchase of District property at Falls Landing, and to authorize the Superintendent to draft a purchase and sale agreement related thereto to bring back to the Board at a future meeting for its review, discussion and possible vote to approve the purchase and sale agreement and send it to a Special District Meeting for final approval pursuant to Section 10-56 of the General Statutes.
- 6. Adjournment.**

February 17, 2022

Robert Grissom, Finance Director

**RE: Regional School District #4**  
Educational Specifications for John Winthrop Middle School

## **PROJECT RATIONALE**

The existing facility at John Winthrop Middle School was evaluated for compliance with the School Safety and Security Guidelines established by the State of Connecticut for educational facilities. One of the key deficiencies identified for the school was the lack of a secure vestibule at the student and visitor entrance to the school. The existing entrance is remote from the main office and there is comingling of students and visitors at the existing entrance which is an egress stair. The main office is located at the second floor while the entrance is located at the lower level, thereby requiring an elevator for access by persons with disabilities. Several options that would address this deficiency have been evaluated for the existing building and the proposed solution which constructs a new vestibule at the exterior of the main office for direct sightlines and access and an exterior covered stair and a ramp is the least disruptive and most cost-effective solution that addresses the needs.

## **LONG RANGE EDUCATIONAL PLAN**

Region 4 is currently conducting a facility master plan for all schools including John Winthrop Middle School. The Board of Education intends to continue utilizing the existing facility as a middle school.

## **LEARNING/EDUCATIONAL ACTIVITIES**

The existing John Winthrop Middle School will continue to provide all educational needs, including extracurricular activities for all grade 7-8 students in the towns of Chester, Deep River, and Essex.

## **ENROLLMENT DATA AND PROPOSED PROJECT CAPACITY**

The proposed project is to meet Safety and Security needs at John Winthrop Middle School and is not impacted by enrollment projections. The addition of an approximately 100 SF secure vestibule does not impact building capacity or future expansion for educational programs. See attached NESDEC enrollment projections.

## **DETAILED DESCRIPTION**

The existing facility at John Winthrop Middle School is a 130,000 square foot (SF) building constructed in 1960 and renovated in 2002. The facility housed grades 7 and 8 and supports a standard middle school educational program. The school includes a gymnasium, media center and an auditorium.

The proposed project is an addition of an approximately 100 SF secure vestibule to meet Safety and Security at John Winthrop Middle School. The scope includes stair access and a ramp at the exterior of the building adjacent to the main office for direct sightlines and access control. The construction will be masonry walls, storefront entry with school guard glass, security hardware, a secure transaction window and the necessary communications infrastructure for control by the main office staff. The ramp and stairs will be poured concrete and the canopy will be constructed of steel columns and framing with a single ply membrane roof. The anticipated impact on the existing facility will be minimal as the work is anticipated to be conducted in the summer months. The locations at the exterior will not disrupt the educational program, however there will be a minor impact on the vehicular circulation for parent and bus pick-up and drop-off if the construction extends into the school year.

The full scope of the project is the secure vestibule of approximately 100 SF, a ramp, and the covered stair access. There will be a new door into the main office from the vestibule. The remainder of the building will be unchanged.

The vestibule is a non-educational transition/circulation space and will not require any furnishings and equipment.

## **BUILDING SYSTEMS**

The proposed building systems will be:

- Security access and control hardware.
- Communication within the vestibule and at the exterior of the vestibule.
- Security cameras

- Transaction window
- The HVAC system will be an extension existing system

All glass will be school guard glass.

## **INTERIOR BUILDING ENVIRONMENT**

The proposed interior building environment will be as follows:

- Acoustical Ceiling tile 2x2 or 2x4
- Masonry walls
- LED recessed lighting
- Aluminum doors and windows with school guard glass.
- No plumbing is necessary
- The HVAC system will be an extension existing system

## **SITE DEVELOPMENT**

The proposed addition will impact the site at the exterior of the building adjacent to the main office which is currently a sloped area with grass and three trees. There will be limited impact on parking and traffic flow if the project extends into the school year, during the student pickup and drop off times. Construction will be halted at these times. There is no impact on athletic fields, playgrounds, parking and recreational use.

## **CONSTRUCTION BONUS REQUEST**

None

## **COMMUNITY USE**

There is no community use of this space except for secure access to the building.

# Enrollment Summary

The global pandemic continues to influence our nation's public health and economic stability in unpredictable ways. As such, it is still too early to identify many of the factors that could impact school enrollments. Over the past school year, we have seen fluctuations in the real estate market and job trends, which have impacted student attendance patterns. Moreover, during the past school year, we have seen how school enrollment patterns can differ substantially from one district to another, with some districts losing students while others experience an influx of students.

We are pleased to send you the past, present, and projected enrollments for your District. New this year, we have added graphs that highlight Historical and Projected Enrollments in Grade Combinations. We have received the figures given to us by the District and we assume that the method of collecting the enrollment data has been consistent from year to year.

Of note, projections are generally more reliable when they are closest in time to the current year. Projections four to ten years out may serve as a guide to future enrollments.

In light of this, NESDEC has added a "Second Semester refresher" enrollment projection at no cost to affiliates.

The NESDEC enrollment projection fell within 10 students of the K-12 total, 1,510 students projected vs. 1,500 enrolled. The projection for K-6 fell within 13 students, 699 projected vs. 686 enrolled, in Grades 7-8 the projection of 249 equaled the enrollment of 249, and in Grades 9-12, the enrollment projection fell within 3 students, 562 projected vs. 565 enrolled. Over the next three years, K-6 enrollments are projected to decline by -21 students, Grades 7-8 enrollments are projected to decrease by -34 students, and Grades 9-12 enrollments are projected to decrease by 100 students, as student progress through the grades.

There are two new charts, Combined Historical Enrollment and Combined Projected Enrollment by town.

## New England's PK-12 Enrollments The "Big Picture"

From 2018 to 2029, the U.S. Department of Education anticipates changes in PK-12 enrollment of +3.3% in the South; +0.9% in the West, -1.8% in the Midwest; and -2.6% in the Northeast.

State	Fall 2018 PK - 12	Fall 2029 Projected	PK-12 Decline	% Change, 2018-2029
CT	526,634	478,000	-48,634	-9.2%
ME	180,461	174,500	-5,961	-3.3%
MA	962,297	945,400	-16,897	-1.8%
NH	178,515	166,100	-12,415	-6.9%
RI	143,436	139,900	-3,536	-2.5%
VT	87,074	82,000	-5,074	-5.8%

**SOURCE:** U.S. Department of Education, National Center for Education Statistics, Table 203.20, August 2020

Note: Data collected prior to 2020 Coronavirus pandemic.

Although most New England districts are seeing a decline in the number of births, NESDEC's experience indicates that the impact on enrollment varies from one district to the next. Almost half of New England Districts have been growing in PK-12 enrollment, and a similar number are declining (often in rural areas), with the other districts remaining stable.

# Reliability and Use of this Document

## PROJECTION METHODOLOGY

Cohort component (survival) technique is a frequently used method of preparing enrollment forecasts. NESDEC uses this method, but modifies it in order to move away from forecasts that are wholly computer- or formula-driven. Such modification permits the incorporation of important, current district-specific information into the generation of enrollment forecasts (such as in/out-migration of students, resident births, HUD-reported building permits, etc.). Percentages are calculated from the historical enrollment data to determine a reliable percentage of increase or decrease in enrollment between any two grades. For example, if 100 students enrolled in Grade 1 in 2018-19 increased to 104 students in Grade 2 in 2019-20, the percentage of survival would be 104%, or a ratio of 1.04. Ratios are calculated between each pair of grades or years in school over several recent years.

After study and analysis of the historical ratios, and based upon a reasonable set of assumptions regarding births, migration rates, retention rates, etc., ratios most indicative of future growth patterns are determined for each pair of grades. The ratios thus selected are applied to the present enrollment statistics to project into future years. The ratios are the key factors in the reliability of the projections, assuming validity of the data at the starting point.

## RELIABILITY OF ENROLLMENT PROJECTIONS

Projections can serve as useful guides to school administrators for educational planning. Projections are generally most reliable when they are closest in time to the current year, and the more stable the variables noted above, the easier and more reliable the projections. Projections six to ten years out may serve as a guide to future enrollments and are useful for facility planning purposes, but they should be viewed as subject to change, given the likelihood of changes in the underlying assumptions/trends.

Projections that are based upon **the children who already are in the district** (the current K-12 population only) will be the most reliable; the second level of reliability will be for those children already **born into the community but not yet old enough to be in school**. The least reliable category is the group for which an estimate must be made to **predict the number of births**, thereby adding additional uncertainty. See these three multi-colored groupings on the “Projected Enrollment” slide/page.

Annual updates allow for early identification of recent changes in historical trends. When the actual enrollment in a grade is significantly different (higher or lower) from the projected number, it is important (yet difficult) to determine whether this is a one-year aberration or whether a new trend may have begun. **In light of this possibility, NESDEC urges all school districts to have updated enrollment forecasts developed by NESDEC each October.** This service is available at no cost to affiliated school districts.

## USING THIS INFORMATION ELECTRONICALLY

If you would like to extract the information contained in this report for your own documents or presentations, you can use screenshots, which can be inserted into PowerPoint slides, Word documents, etc. Because screenshots create graphics, the image is not editable. Please feel free to contact us if you need assistance in this matter, by phone (508-481-9444) or by email ([ep@nesdec.org](mailto:ep@nesdec.org)).
