

WINTER AFTER-SCHOOL ACTIVITIES

Here is a quick description of the activities offered this fall. Activities will meet on **Wednesdays** from **2:30 - 3:30**. The dates are as follows: **February 3, 10, 24, and March 3, 10, and 17**. There is no charge for participation in any of the activities. Sign up and we guarantee you will have a ton of fun!

MAGNIFICENT MUNCHING

Ready to get energized after a long day in school? Come on down to the Life Management room and prepare delicious drinks and treats to get yourself recharged. We'll experiment with new ingredients and aim for irresistible snacking!

OPEN COMPUTERS

Come hang out in the computer lab after school! You can finish homework, work on projects, or even play a school-appropriate game on the computers. All programs will be available to you and Mrs. Sabia will be available to help. If you love working on computers, then this is the activity for you!!

OPEN STUDIO

Come one, come all to Open Studio! This is an opportunity for you to explore areas of art above and beyond what happens in the classroom. You will be able to throw pots on the wheel (we have two working wheels!), create raku ceramic sculptures, work with plaster and wire to create fantastic sculptures, create large paintings on canvas, make beaded jewelry, design mosaics, and much, much more!

LEGOS AND MORE

Is there an engineer, architect, or industrial designer in you that's bursting to express him or herself? Well, if so, let your imagination soar in this activity! Build with Legos or K'nex as you chat with your friends. Save creations from week to week or begin fresh each time.

SOLAR CAR COMPETITION

This activity is open to the students who have already started a solar car for the UCONN competition. We will make modifications to build our cars faster, stronger, and lighter.

VINTAGE GAMING

Have you ever played games on an original *Nintendo*, *Sega Genesis*, *Odyssey*, or *Atari*? If you haven't, you need to experience these awesome video gaming systems. We will play classic games like "Super Mario Brothers", "Tanks", "Showdown", "Sonic", "Metroid", "Zelda", and crudely animated sports games. There are also many other games which are fun and challenging. Hang out and have a blast in the 8 South wing, using TVs and the projector to play vintage video games!

Come and join in the fun! Fill in the form below and return it to the box in the front office by **Friday, January 29th**.
